Results: Count Data by Count Circle

Below you will find data for the CBC count circle and time period you selected. If you have selected a long time range, your table will probably be larger than your computer screen width, and you may have to scroll to the right. Information about the weather, number of participants and other count particulars is found in a separate table at the bottom of this page. Species are presented in taxonomic order. Data includes raw count numbers, numbers per party hour, and any "flags" added to point out special information about a given record.

Flags included with species are: **UH** - Unusually High Number **US** - Unusual Species **CW** - Reported in the area during Count Week, but not reported during the count. [Download File Format Reference](#)
